The Nobel prizes are awarded for mankind’s greatest achievements. Each year the newly named laureates deliver on the work that won them the prizes.

World Scientific has the exclusive rights to publish in English a collection of the Nobel lectures, the prize presentation speeches and the biographies of the Nobel laureates for the years 1971-1995 in Physics, Chemistry, Physiology or Medicine, and Peace; 1968-1995 in Literature; and 1969-1995 for the Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel.

These volumes are edited and compiled by eminent academics recommended by the Nobel Foundation, and consist of the lectures arranged by subject in chronological order, with updated biographies of the laureates since they were awarded the Nobel prize. Each volume in the collection will serve as a vital reference book; the paperback edition makes the lectures more accessible to discerning individuals.

Transgenic Technology Leader
Yesterday, Today and Tomorrow

We brought you the world's first cotton seed with built-in insect resistance, continue today as the leader in cotton transgenic technology and are building the foundation for tomorrow's advances in transgenic cotton seed technology.
