

## **Biofuel Producers and Users to Convene in Singapore for Global Biofuels Summit**

*Leading biofuel producers and end users from road transport, shipping, aviation and others meet in Singapore for CMT's Global Biofuels Summit on 22-23 October, 2019 to discuss the demand for biofuels, capacity expansion, government mandates, and more.*

In step with biofuels test by airlines, IMO 2020 implementation of the lower 0.50% limit on sulphur in ships' fuel oil, new government mandates for higher transport biofuel blending, the Singapore summit, is well-timed to track the progress of this fast growing industry. An exclusive **Site Visit to Neste's Singapore bio refinery** is arranged to give participants a first-hand experience, and a presentation on **Neste's 'Sustainable Production Focusing on Circular Economy'**.

Also presenting is Indonesia's **PT Pertamina (Persero)** on 'Converting Crude Palm Oil (CPO) into Green Fuel'. Utilising [Used Cooking Oil \(UCO\)](#) as a feedstock is a popular option for producing environmental-friendly biofuels. Singapore's **Alpha Biofuel** shares their success stories on transforming UCO into biofuel while **Bharat Petroleum** – that recently commissioned 2G ethanol bio-refinery – reveals the 'Roadmap for Advanced Biofuels in India'.

Meanwhile **Goodfuels** -- that runs a GoodShipping Program for companies like IKEA & Heineken to make sea-shipments sustainable -- will present [Marine Biofuels](#) case studies and prospects in Asia.

**Novozymes**, currently -- helping 5 commercial scale plants with its industrial enzyme technology -- is providing inputs on 'Catalysing Cellulosic Ethanol Production for Sustainable Supply of Liquid Fuel' - highlighting Chinese government's initiatives and subsidies to implement the [E10 mandate](#) by 2020 and more.

Biofuels users - **Scania** and **BHP Biliton Marketing Asia** share the challenges and opportunities in Biofuel Applications in Heavy Duty Vehicles & Maritime Applications. Likewise **Tata Motors**, India's largest automobile manufacturer, outlines differences between adopting EV and Biofuels - based on availability, infrastructure and technology requirements.

The program also includes a Panel Discussion on 'Sustainable Feedstock Supply to Meet Growing Biofuel Demand' with panelists from **Eni Trading & Shipping, Neste, Bharat Petroleum** and **Alpha Biofuels**.

Other key sessions are:

- Biofuel Outlook in Malaysia & Indonesia - **Drewry Maritime Services**
- Emerging Technologies in Converting Biomass into Biofuel - **Lux Research**

View the [final agenda](#) for all speakers and sessions.
